Professional Summary

Cybersecurity professional with experience in risk analysis and management, IT auditing, and information security governance in complex corporate environments. Currently working as a Cybersecurity Risk Analyst at PwC, participating in projects aligned with regulatory frameworks such as ENS, NIST, ISO 27001, and NIS2 for high-profile clients. Possesses a strong technical background in full-stack .NET software development, enabling a deep understanding of systems, applications, and associated risks. Analytical profile, focused on continuous improvement and driven by academic specialization in cybersecurity.

Work Experience

Cybersecurity Risk Analyst

August 2025 – Present

PricewaterhouseCoopers (PwC) – Community of Madrid, Spain

- Cybersecurity risk analysis and management in complex environments, aligned with regulatory and compliance frameworks such as ENS, NIST, ISO 27001, NIS2, and Magerit.
- Participation in IT Governance, Risk & Compliance (GRC) projects, assessing security controls, process maturity, and regulatory compliance.
- Execution of IT audits and security assessments for large organizations, including clients such as Redeia and CORPME.
- Development of Threat & Vulnerability Management activities, threat analysis, and support in Cyber Threat Intelligence for strategic decision-making.
- Use of tools and languages such as PILAR, SQL, and Python for risk analysis, data processing, and task automation.
- Collaborative work in multidisciplinary teams, contributing to the preparation of executive and technical reports for different organizational levels.

Full Stack Software Engineer (.NET)

June 2024 – August 2025

NalCOM Servicios Informáticos – Community of Madrid, Spain

- Development of full-stack web applications based on .NET technologies, applying MVC architectures and software engineering best practices.
- Implementation of backend functionalities using C# and Entity Framework, and frontend development with JavaScript, HTML5, CSS, and Bootstrap.
- Design and management of relational databases using Microsoft SQL Server, optimizing queries and data models.
- Participation in projects for clients in the pharmaceutical sector, such as Novo Nordisk, working in professional, business-oriented environments.
- Use of Azure DevOps Server for version control, task management, and continuous deployment.
- Teamwork following structured methodologies, with a focus on quality, maintainability, and compliance with technical requirements.

Education

Master's Degree Student in Cybersecurity

Complutense University of Madrid (UCM) - Madrid

Bachelor's Degree in Computer Engineering

Polytechnic University of Madrid (UPM) – Madrid

English – Advanced C1

Cambridge Assessment English

Skills

- Analytical thinking and risk management orientation.
- Ability to work with regulatory frameworks and complex technical environments.
- Attention to detail and strong focus on quality and compliance.
- Ability to communicate technical results to different organizational levels.
- Teamwork and collaboration in multidisciplinary environments.
- Motivation for continuous learning and specialization in cybersecurity.
